Louis Gonzalez

Senior Developer

Dallas, Texas · mail@louis.gg · louis.gg · github.com/louisgon · linkedin.com/in/lougon

SUMMARY

Senior developer in Dallas with 13 years of web development experience and 170+ projects delivered. I work across the full stack on client sites and apps, from content systems and APIs to the interfaces people use.

EXPERIENCE

Senior Developer, Goodfolks

2024 to now

- Work across the full stack on long running sites and apps for news publications, enterprise software companies and nonprofits, with 5,000+ commits since 2022.
- Led the front end for a subscription news company's move from WordPress to Rails, spanning four connected sites and a shared library of 100+ ViewComponents.
- Delivered headless WordPress and Craft CMS sites using Astro and Cloudflare Workers, with data layers, reusable blocks, tag based caching and multilingual routing.
- Developed paid subscription systems end to end, from tiered paywalls and Stripe checkout to sign in and reader accounts.
- Maintain and expand a WordPress marketing site for an enterprise software company while developing its Craft CMS and Astro replacement and migrating its content.
- Developed reusable block libraries of 50+ blocks for editors, alongside GSAP animation and Core Web Vitals improvements across client sites.

Web Developer, Goodfolks

2022 to 2024

- Worked across the full stack of a large Craft CMS product catalog from the first commit, including API driven filters, model comparison and a custom PHP module.
- Developed WordPress, Craft CMS, HubSpot and Rails projects for enterprise and publishing clients.

Frontend Developer, Calibrate

2020 to 2022

- Developed the front end of 20+ agency projects, including custom WordPress themes and reusable page sections.

Freelance Developer

2013 to 2020

- Delivered 150+ independent web projects, including work for global brands in travel, retail and technology.
