Louis Gonzalez

Senior Developer

Dallas, Texas · mail@louis.gg · louis.gg · github.com/louisgon · linkedin.com/in/lougon

SUMMARY

I work across PHP, Rails and TypeScript on content systems, APIs, subscriptions and the interfaces people use. I'm a senior developer at Goodfolks in Dallas with 13 years of professional development and 200+ projects delivered.

EXPERIENCE

Senior Developer, Goodfolks

2024 to now

- Work across the full stack in PHP, Rails and TypeScript on sites and apps for publishers, enterprise software companies and nonprofits.
- Led front end development for a subscription publisher's move from WordPress to Rails across four connected sites and a shared component library.
- Delivered headless WordPress and Craft CMS sites with Astro on Cloudflare Workers, from API data layers to search, multilingual routing and caches that purge when editors publish.
- Developed paid subscription systems end to end, from tiered paywalls and Stripe checkout to sign in and reader accounts.
- Maintain and expand an enterprise WordPress marketing site while developing its Craft CMS and Astro replacement and migrating its content.
- Developed reusable block systems for editors, with GSAP interactions and Core Web Vitals work across client sites.

Web Developer, Goodfolks

2022 to 2024

- Worked across the full stack of a large Craft CMS product catalog from its first commit, from the content model and a custom PHP module to API driven filters, model comparison and owner manuals.
- Developed the Rails front end of a weekly publication with ViewComponent and Stimulus, across navigation, section pages, search, subscriptions and the shop.
- Developed custom WordPress themes and HubSpot CMS sites for enterprise, publishing and nonprofit clients, with reusable blocks, editorial templates and custom modules.

Frontend Developer, Calibrate

2020 to 2022

- Turned agency designs into custom WordPress themes, writing the templates, styles and interactions for each site from scratch through launch.

Freelance Developer

2013 to 2020

- Delivered 150+ independent web projects, including work for global brands in travel, retail and technology.
